

# Job Description

## SUMMARY:

The Data Visualization Analyst understands the business with the ability to translate the needs into requirements, particularly as it relates to VBS financial performance and population health, and is also a specialist on how to visually display and analyze data with a user experience focus; works closely with the Data Developer and business to rapidly iterate over product deliverables.

## ESSENTIAL DUTIES AND RESPONSIBILITIES:

- Work closely with our clients as part of a development team to evaluate requirements for the implementation of business intelligence and data warehousing solutions
- Support and help build the process to grow the analytic capabilities of the organization
- Build strong collaborative relationships with the business users and the data analytics team
- Help the business users refine and capture the requirements for their reporting needs
- Transform the reporting needs of the business into actionable requirements for the implementation by the analytics team
- Participates in design/development of comprehensive data processing, reporting and analytical solutions

## KNOWLEDGE SKILLS AND ABILITIES:

- Hands on exposure to relational database technology preferably SQL Server
- Experience creating visualizations in Tableau, Power BI as well as creating reports in SQL Server Reporting Services
- Ability to convey complex data via visual techniques to succinctly communicate for decision-making and storytelling
- Familiarity of standard concepts, best practices, and procedures within a data warehousing and business intelligence environment
- Excellent organizational and communication skills to work in a fast-paced environment and manage and prioritize multiple tasks simultaneously
- Ability to work well in a team of 2 -- 5
- Proficiency with Microsoft Office Suite with an emphasis on Excel
- Exposure to SSAS and report generation via Excel a plus
- Must be strong at problem solving and demonstrate an analytical mindset
- Strong written, verbal communication and presentation skills. Must be able to convey information in a clear, focused, and concise manner
- Desire to learn, grow, and seek increased responsibility

## EDUCATION and / or CERTIFICATION/LICENSURE:

- Bachelor's degree required

## EXPERIENCE:

- A minimum of 3 years of previous business analytical experience
- Healthcare experience preferred
- Prior experience with Data Visualization
- Experience using Tableau or Power BI to design reports and dashboards
